Mateus Goncalves Machado

mateus.gm@gmail.com (81) 97101-3464 goncamateus mateusgmachado

Education

BSc **Universidade Federal de Pernambuco**, Computer Engineering — Jan 2019

MSc **Universidade Federal de Pernambuco**, Computer Science — July 2022

PhD **Universidade Federal de Pernambuco**, Computer Science — Jan 2023 – present

Experience

ISI-TICs, Machine Learning Engineer — Recife, Pernambuco, Brazil
- Team Lead — Sept 2025 – present
- Task management — 1 year 2 months
- Discovery and application of Reinforcement Learning methods for real-world problems
- Application of object georeferencing from drone images

CIn-Softex Robotics Residence, Tech Lead — Recife, Pernambuco, Brazil
- Task management — Aug 2024 – Sept 2025
- Discovery and exploration on robotics technologies — 1 year 2 months

ParqueTec-UFPE, Cluster Manager — Recife, Pernambuco, Brazil
- Managed the cluster of the ParqueTec-UFPE — Feb 2024 – July 2024
- Organized the activities of the cluster — 6 months
- Slurm management

Academic Experience

Renewable Energy Center — Recife, Pernambuco, Brazil
- Studied Time Series methods for Wind Power Prediction on Wind Farms — Feb 2020 – Dec 2022
- Developed Machine Learning methods for Wind Power Prediction on Wind Farms
- Designed and developed a Web application to analyze the status of Wind Turbines/Farms and the prediction of the Time Series

Proxy Oil Lab - LITPEG — Recife, Pernambuco, Brazil
- Studied Artificial Neural Network methods for sequential data prediction — Feb 2023 – Feb 2024
- Developed Machine Learning methods for sequential data prediction

RobôCIn — Recife, Pernambuco, Brazil
- Mainly used technologies are C++, Python, Docker, and Notion. — Jan 2017 – present
- Designed and developed robot soccer behaviors.
- Developed artificial intelligence algorithms to apply on soccer robots.
- Developed metrics to analyze data regarding the team performance.
- Lead the team, organizing, schedule, activities, and managing Git repositories.

Skills

Languages: Python (6 years), SQL, ROS2, C/C++ (2 years)

Technologies: Deep and Machine Learning, Python Frameworks, ROS2, Gazebo, Docker, Git, Unix/Bash

Languages: Portuguese (Native), English (C1)

Accomplishments

- Winner in Latin America Robotics Competition among 10 teams (2020, 2021, 2022, 2023)
- Second place in HackaSerpro (2019)
